### ***The mixture of the original BRITA water filter cartridge in the Czech Republic***

Dear Pavel, dear Milos,

The BRITA household water filter optimises tap water for the preparation of hot and cold beverages. The content of the original BRITA filter cartridge consists of a combination of ion exchangers and activated carbon, which is particularly suitable for this type of drinking water conditioning.

BRITA has developed a special cartridge for the Czech market taking into consideration the characteristics of Czech tap water as well as the requirements of the national Drinking Water Act. This way, consumers are provided with optimal BRITA-filtered water.

Best regards
